DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/5/07 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 10, 11, 135-139 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 10 and claim 135 recite the limitation of "the gas flow rate" in line 7. There is a lack of antecedent basis for this limitation in the claims.

Claims 11 and 136 recite the limitation "the patient" in line 1. There is a lack of antecedent basis for this limitation in the claims.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 10, 11, 48, 124-130, 135-139, 181-191 and 198-209 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-7, 11-30 and 32-39 of copending Application No.

10/696959. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method steps recited in the instant application are also recited in the claims of the patent.

6. The independent claims of the instant application recite the steps of depositing an active compound (or drug), heating the drug, and mixing the resulting vapor with a gas to form an aerosol.

7. With regards to claim 10, one of ordinary skill in the art would have found it obvious to add the step of stopping the heating step if the desired particle size is not met in order to prevent the active compound from being wasted
8. With regards to claims 48 and 199, the step of mixing the resulting vapor with gas is also viewed as the cooling step.
9. With regards to claim 124, one of ordinary skill in the art would have found it an obvious matter of design choice to use a mesh screen as a substrate.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

10. Applicant's arguments filed on 12/5/07 have been considered but are moot in view of the new ground(s) of rejection.
11. The indicated allowability of claims 10, 11, 135-139 is withdrawn in view of the new grounds of rejections (provisional Double Patenting and 35 USC 112).
